

Medical Discs

Archival Media for Medical Segment

Moser Baer's Medical grade discs are customized, blank CDR discs for radiology, Ultrasound, CT, digital X-ray departments etc. Pre-printed, personalized, medical-grade discs are used for distribution of digital medical images & data.

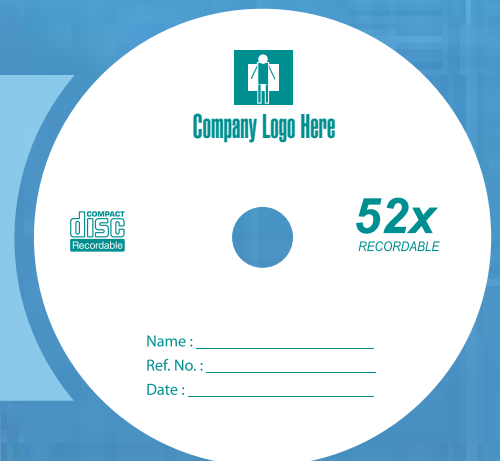

It fills a niche for medical imaging facilities looking to share data in a secure manner with their customers. The customized printing also enables them to improve the aesthetics of the discs.

This product is ideally suited to cater to meeting the requirements of hospitals, medical centers etc, which have an inherent requirement to capture personalized data & medical images of patients.

Patient history needs to be captured & stored over a long period of time in order to enable comparison in future. Historical data of patients is best maintained in WORM type (Write Once Read Many) media, which is currently best managed in Optical media format.

MBI offers this product with Anti Scratch coating to prevent any data loss/damage due to repeated usage. This product can also be offered with an IJP/Thermal printable surface for meeting the customized printing requirements of the customers

- a) Long Archival Life
- b) Anti scratch coating to prevent damage from repeated usage
- c) Personalized discs with company logo, address
- d) Pre defined area for patient information
- e) Inkjet / Thermal printable surface
- f) Compatible with all leading drives including the Plextor Premium & Plextor 716
- g) Ideal for medical centers, hospitals, healthcare service providers

Medical Discs *your records for life*
