

“Ivory” White DVDR

TM
moserbaer

Moser Baer’s “Ivory” White DVDR has a specially developed premium white surface to enhance the printing of different colors. The disc has a factory-made (customized) white surface to directly print different colors and images without a white base layer.

It is ideal for use in offset printing that requires a white-color donut to be printed as the first layer. The white base enhances the image sharpness & colors without the extra process of creating a base white ink layer.

The disc is compatible with leading drives such as Pioneer, Plextor, and LG. “Ivory” White DVDR is available with an inkjet or a thermal printable surface and a scratch resistant recording surface.

The premium white printing surface of the disc makes it easy to customize using bright colors for office and home applications. It is available in speeds of up to 16x.

About Moser Baer India Ltd

Moser Baer, headquartered in New Delhi, is one of India's leading technology companies. Established in 1983, the company successfully developed cutting edge technologies to become the world's 2nd largest manufacturer of Optical Storage media like CDs and DVDs. The company also emerged as the first to market the next-generation of storage formats like Blu-ray Discs and HD DVD.

Recently, the company has transformed itself from a single business into a multi-technology organization, diversifying into exciting areas of Solar Energy, Home Entertainment and IT Peripherals & Consumer Electronics.

Moser Baer has a presence in over 82 countries, serviced through six marketing offices in India, the US, Europe and Japan, and has strong tie-ups with all major global technology players.
