

Your Multimedia device companion

Moser Baer introduces its latest, tiny sized microSD memory card for high performance; with impressively fast data transfer speeds. It is the perfect choice of Memory Card for use in the next generation of mobile phones, which include a memory card slot as standard. Moser Baer's microSD card can also be used in regular SD memory card slots by combining card with its provided adapter, thus ensuring that the microSD card can be used in all compliant SD card devices.

About the Company

Moser Baer headquartered in New Delhi, is a leading global technology company. Established in 1983 the company is now having state of the art manufacturing facility for Solid state media using SMT line. Moser Baer's strength is OEM scale quality manufacturing with customized digital content loading and flexible packaging facility.

micro SD	
Capacity	1 / 2 GB
Interface	SD 2.0
NAND Flash Technology	MLC
Max Interface Performance	25Mhz
Operating Voltages	3.3V
Active Current	Read: 100mA Write: 100mA
Operating Temperatures	-25 to 85 C
Physical Dimensions	Length: 11mm Width: 15mm Thickness: 0.95mm

Features:-

- Miniature Form Factor
- Perfect for ultra-compact mobile phones
- MicroSD adapter for standard SD Card slots
- Easy to use, plug-and-play operation
- Storage Capacity from 1GB to 32GB
- Digital Content Preloading Facility

Advantages:-

- Size of finger Nail.
- Portable device
- High Flexibility
- Usage is a child's play.
- Meet your growing data needs.
- Customized data upload
